KEY

Daniel Tammet grew up in a large family in East London. At the age of four he started to have some very **(1) severe** seizures that may have changed his brain. Scientists claim that there are **(2) cases** in which young people, who suffer some kind of brain **(3) damage**, suddenly emerge with special abilities.

About 10% of all autists are savants, people with special talents. Normally such people cannot tell you how they do something, but Daniel is **(4) an exception**.

In 2002, a British TV team visited Daniel Tammet in order to test his **(5) ability** to calculate large numbers. The examiners were stunned by the results. Daniel was even able to outdo the computer. He can cite numbers by **(6) drawing** shapes on the table with his fingers. In addition, Daniel can speak 11 languages **(7) fluently** and claims that he can learn any foreign language within a week.

In March 2004, another experiment was **(8) carried** out in front of a live audience. Daniel Tammet stated that he could recite 22 500 decimal places of the constant pi, an infinite number with no certain pattern. He completed this **(9) task** successfully in over five hours.

In another test Daniel was given a week to learn a totally new language, Icelandic, and then chat with presenters on live television. **(10) According** to locals, Icelandic is difficult to learn and nearly impossible to speak because of many funny sounds. It normally takes some time to **(11) adjust** to the sounds of a new language. But as time went on, even Daniel's teacher was amazed at the progress her pupil was making. When appearing on TV, experts were **(12) stunned** to see Daniel speaking the language so confidently.

Experts on autistic savants agree that there probably only a few dozen people around the world who have the same abilities as Daniel. Scientists are excited to study Daniel and his extraordinary **(13) talents** because it gives them the chance to get a glimpse of the human brain in a way they have never seen before. It may even be the start to **(14) exploring** a new kind of intelligence.

In 2008 Daniel wrote **(15) an autobiography** called *Born on a Blue Day*, which deals with his personality and talents. Since then he has written other books and appeared on numerous TV and radio shows in the US and the UK.
